BPW genuine spare parts

GENUINE QUALITY MAKES A DIFFERENCE.

ONLY THE ORIGINAL IS GENUINELY THE BEST.

Genuine BPW quality should always be the first choice – especially when safety is at stake. Thanks to careful friction pairing of the brake discs/pads and brake drums/linings, for example, BPW brakes offer the best possible braking and wear behaviour.

Trials have confirmed that the use of inferior-quality nongenuine parts can impair braking behaviour. In practice, this is reflected in a longer stopping distance when the brakes are applied in an emergency, and uneven wearing of the brake components over time. The consequences are diminished safety, much shorter service lives, and higher costs arising from accelerated wear.

QUALITY AND SERVICE IN EVERY DETAIL.

BPW lubricants represent an investment in vehicle reliability. It therefore makes good sense to insist on genuine BPW quality – as exemplified by the BPW ECO-LI and BPW ECO-LI 91 long-life greases.

Some anti-friction bearing greases appear similar to, or even deliberately imitate, the BPW genuine product. By using alternatives, however, you can impair the reliability and operation of the lubricated bearings and brakes. On no account is the lithium-based BPW ECO-LI to be mixed with other greases, such as those based on sodium. Mixing reduces lubricity and, in some circumstances, can cause the bearings to overheat or even fail. For this reason, always insist on the genuine product. Ask your BPW authorised dealer about BPW ECO-LI and BPW ECO-LI 91 anti-friction bearing grease.

ALSO TAKE A LOOK AT OUR OTHER BPW GENUINE SPARE PARTS:

BPW DRUM BRAKES

Safe in every situation.

- Brake lining wear indicator.
- Wearing edge on brake drum.
- Perfect pairing of brake drums and linings.

IMPRESSIVE BENEFITS.

Lithium complex grease
for anti-friction bearings. +

Excellent lubricating effect for
reduced bearing wear. +

Highly effective protection against wear pro-
longs service life of the entire bearing. +

Supreme anti-corrosion properties. +

BPW DISC BRAKES

Proven dependability.

- Special BPW brake disc alloy ensures good durability.
- Heat dissipation optimised by enlarged disc surface area.
- Perfect pairing of brake discs and pads.

- + Highly suitable for high-pressure centralised lubrication systems.
- + Consistency grade 2 – 3.
- + Technical customer service & support.
- + Very good adhesion even at high temperatures.
- + Temperature range from -30 °C to +160 °C.

BPW AIR BAGS

Quality capable of withstanding any pressure.

- Perfect fit and simple installation.
- Designed according to BPW specification.
- Economical solution thanks to long service life.
