

Landscaper Pro[®]

Finesse Southern Europe (SE)

Rough patches just require a little finesse

Description

Finesse Southern Europe (SE) is adaptable to varied management. The blend contains fine fescues for high density rooting for improved soil stability. Its dense, attractive fine textured turf makes Finesse SE a great choice for high quality ornamental lawns. The inclusion of hybrid *Poa pratensis* increased the blends drought tolerance. Available pack sizes - 5 kg and 10 kg

Mixture

50% *Lolium perenne*

20% *Festuca rubra commutata*

10% *Festuca rubra rubra*

20% Hybrid *Poa pratensis*

Benefits

 Adaptable to varied management

\\ High density rooting for improved soil stability

\\ Dense attractive turf

\\ Increased drought tolerance

Application Rates

Sowing Rate:

25-35 grams/m²

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

How to use

- 1 Recommended mowing height: from 15 -40 mm.
- 2 Recommended fertilizer type: all granules
- 3 If you need more information, please contact your technical support.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
