

Landscaper Pro®

Performance Southern Europe (SE)

A pro performance on and off the pitch

Description

Performance Southern Europe (SE) is a tall fescue based blend, with deep aggressive rooting capable of accessing water deep in the soil profile. This produces a water efficient, drought tolerant sward. Additionally, excellent soil stability is achieved through the combination of hybrid Kentucky bluegrass. Perennial ryegrass is included to aid initial fast establishment.

Mixture

80% Festuca arundinacea

10% Lolium perenne

10% Hybrid Poa pratensis

Benefits

Deep aggressive rooting

Water efficient

 Drought tolerant sward

 Excellent soil stability

 Fast establishment

Application Rates

Sowing Rate:

35-50 grams/m²

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

How to use

- 1 Recommended mowing height: from 25-50 mm.
- 2 Recommended fertilizer type: all granules.
- 3 If you need more information, please contact your technical support.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
