Structural description

Reset key

Add device: press 3 time, then hold on the press reset key till the light on

Remove device: press 3 time, then hold on the press reset key till the light on

### Indicator light

Colour: green;

Light on: Remove device

Basic parameters

| Product model	DS82-Tuya-ZGB	Radio frequency	2.4G/433MHz	Maximum width	12m
Rated power	45W	Maximum payload	50Kg	Protection grade	20IP
Rated current	0.14A	Fuselage weight	1.05Kg	Running time	>4min
Rated torque	1.2Nm	Operation noise	33dB	Working temperature	-10℃~50℃
Running speed	14cm/s	Minimum width	0.9m	Power line type	2 core
Working voltage	100~240Vac 50/60Hz				

Functional characteristics

- Touch start function
- Power failure pull function
- Resistance And Stop Function
- Run gracefully
- Fabric rebound correction function
- Stroke fine tuning function
- Electronic memory limit
- Remote control
- Timing control
- Speech control
- Positive inversion settings
- Calibration function

Motor installation

1. Check whether the pull-out lock rod is in the schematic position. If on the right side of the diagram, pull the pull-out lock rod while pulling it to the left.

2. The motor is inserted into the main transmission box.

3. Pull out the locking rod to the right until the rod head falls into the right limit hole.

Motor disassembly

1. Pull down the locking rod downward to make the top slide out of the limit hole.

2. Pull and pull the lock bar to the left side.

3. Remove the motor.

Pull out lock rod

⚠ Be careful

- Install according to the size requirements in the illustration.
- Ensure the position of the pullout lock rod in the illustration.
- The ceiling of the motor must be strong enough to withstand all the weight including the guide rail, motor and curtain cloth.

Remote control pair code

A road forward key — B road forward key
A road close key — B road close key
A road stop key — B road stop key
A road open key — B road open key

B path setting key — A path setting key
