

Sistem usi glisante LINE-PAX - SCHITA DE MONTAJ -

In schita de mai jos este figurat interiorul (golul) unui dulap.

Calculul profilelor pleaca de la stabilirea dimensiunii usilor:

⇒ **Calcul inaltime usa** (inaltime usa = inaltime profil maner/vertical)

$$\text{Inaltime usa (h)} = H - 38 \text{ mm}$$

$$\text{Inaltime usa (h)} = H - 42 \text{ mm (pentru montare amortizor mini SV40)}$$

⇒ **Calcul latime usa** (in functie de cate usi are dulapul: 2, 3, 4 usi):

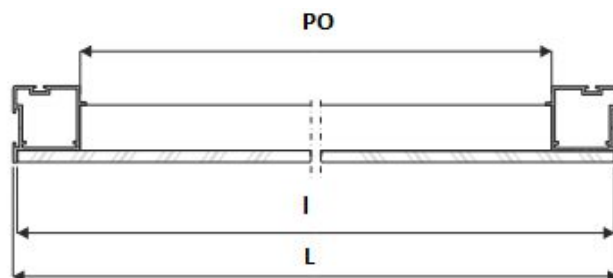

Numar usi	Latime usa (L)
2 usi	$\frac{A + 22\text{mm}}{2}$
3 usi	$\frac{A + 47\text{mm}}{3}$

⇒ **Calcul inaltime sticla (D):**

$$D = \text{Inaltime usa (h)} - 4 \text{ mm}$$

⇒ **Calcul latime sticla (I):**

$$I = \text{Latime usa (L)} - 4\text{mm}$$

⇒ **Calcul profile orizontale sistem:**

$$\text{Lungime profil orizontal superior / inferior (PO)} = L - 50 \text{ mm}$$
