# CREATIVE COOKING. DELICIOUS DINING.

At Amefa we know all about cutlery. After all, we've been setting tables all over the world since 1931, the year that Amefa was founded by the young, entrepreneurial Eugen Hollaender as the Apeldoorn Knife Factory.

We are proud to say that we are one of Europe's leading suppliers of cutlery and related products and that our company is still based in Apeldoorn.

Fourchette or gaffe? Cuchillo or coltello? There are lots of languages spoken at our table. Amefa cutlery can be found on tables all over the world and is sold in more than 85 countries.

### Establishing Amefa

On 19 September 1931 Eugen Hollaender, at the age of 25, established the 'Apeldoornsche Messenfabriek N.V. Haagse Import Maatschappij Olanda'. Together with a few employees Eugen started producing razor blades. At that time many men wanted a smooth shave in order to impress the ladies. Demand for razor blades grew considerably during the early years of the war.

In the following years the production of razor blades gradually came to an end. After Eugen Hollaender visited Japan for the first time to buy flatware, the company's importing activities really took off. The imported products were sized and finished crudely, so final processing still took place in Apeldoorn.

### International sales network

In the nineties Amefa expanded considerably. Subsidiaries were opened in the UK, Poland, Hong Kong, France, Spain and Italy. The company grew into one of the biggest players in the international cutlery market. In 1992 Amefa obtained the rights to the Monogram flatware brand. This brand has become internationally renowned for modern, trendy and timeless designs at an attractive price point.

### In-house silver plating

Silver plating is the difficult process of bonding a silver layer to stainless steel.

In 1964, Amefa developed a new technique together with specialists from Solingen in Germany and started its own silver-plating department.

To improve the sales network, Amefa Solingen was established in Germany in 1966. The first of many to follow! And in order to coordinate imports, Erik Hollaender settled in Japan and soon established Amefa (Far-East) Ltd. in Niigata-Ken in 1968.

# AMEFA HISTORY

## Expanding brand portfolio

Amefa Premiere, a beautiful and inspiring new flatware brand, was introduced into the market in 2002 with the aim of gaining ground in the premium market sectors. The mid and low end sectors had already been won over by the Amefa and Monogram brands. In 2004 Eugen Hollaender's youngest son Fred Hollaender became responsible for the Amefa Group. At the end of 2005, Amefa took over the French company Couzon, thereby gaining ground in the French and international markets. In 2005 Amefa also started a purchasing office in Tianjin, China. At the end of 2007 Amefa took over the renowned kitchen knife manufacturer Richardson. The Richardson Sheffield brand added international credibility to the kitchen knife portfolio of the company.

## First steps in porcelain...

In 2010 Amefa took over Medard de Noblat, a French manufacturer of high-quality tableware from Limoges, an addition which fits in with the new Amefa set table strategy. From 2014 Amefa took over the well-known international brands of Cuisinox, Paul Wurths, Lou Laguiole and Kuppels. With all these products Amefa is able to operate in international set table markets. From 2013 onwards Peter Hollaender, grandson of the founder and therefore the 3rd generation family, became CEO.

## Amefa: an innovative company

Today Amefa is a company that constantly innovates. In 2015 Amefa introduced a new set Integral. Integral has been specifically developed for people with limited gripping ability and wrist movement. Its aesthetic appearance and proven functionality allow users to eat independently and makes the everyday pleasures of good food even more enjoyable. Integral won an international RedDot Award in 2015.

# QUALITY AND CRAFTSMANSHIP

Cutlery is widely available in all shapes and sizes. What makes Amefa stand out is our passion for quality and craftsmanship. To ensure durability and lasting performance, we apply high quality standards to all our products. Based on our extensive expertise, we make sure that price and quality always go hand in hand.

Amefa understands the significance of social responsibility. For over a decade, we have been a proud member of the Business Social Compliance Initiative (Amfori BSCI). All our products are made in BSCI certified factories. To drive environmental improvements in our business activities we also became a member of Business Environmental Performance Initiative (Amfori BEPI).

BEPI

# CUTLERY MAINTENANCE

## All Amefa products are subjected to rigorous quality control.

Cutlery is produced in either 18/0 chrome steel or 18-10 chrome-nickel steel. These types of steel are stain resistant. Modern dishwashing systems and today's aggressive detergents will not be harmful to your cutlery as long as you follow these guidelines.

### Stains on cutlery can be caused by:

- Insufficient cleaning or drying
- Too high a dosage of detergent
- Not rinsing the cutlery after usage so acids and salts from food products can stain or damage the cutlery.
- Contact between various types of steel like chrome and chrome nickel steel or chrome nickel steel and silver(plated) material. (contact corrosion)

## To prevent stains we advise you to follow these instructions:

- Rinse the cutlery directly after usage
- Dry cutlery by hand with a dry cloth if still moist after cleaning in the dishwasher.
- Please follow the dosage of detergents as per the instructions of the manufacturers. Very dirty dishes do not require a higher dosage of detergent.
- Follow the maintenance instructions of your dishwasher meticulously.
- To prevent contact corrosion (caused by different types of steel which come into contact with each other) we advise you to put the knives in a different basket than the forks and/or spoons.
- Place the blade of the knife upwards and the prongs of the forks as well. This causes the water to rinse off easily and to guarantee proper cleaning of the various items.
- Remove the cutlery from the dishwasher as soon as the cleaning program is finished.

# SILVER PLATED

## **Silver plated cutlery**

Silver plated cutlery is the epitome of table culture. The silk appearance of the material is unique and adapts to use on both classic and contemporary patterns. Amefa has a range of patterns suitable for silver plating, which comply with the most stringent quality demands of the industry. For the modern silver-plating process, Amefa always uses the 'electro plating' of silver onto the chrome nickel steel, which complies with the European Standards EN ISO 8442-2. The material is as important as the finishing. We therefore only use the highest quality 18-10 chrome nickel steel.

# PVD COLORED CUTLERY

This season's most versatile PVD colours bring a touch of warmth and understated glamour to the table. Expertly cut from the finest materials and polished to a sublime finish. PVD (Physical Vapor Deposition) means several layers of titanium coating were added to give the cutlery a vibrant colour that makes a true statement on any table. Whatever your choice, mirror or matt, daring black or glamorous copper, our coloured cutlery collection will be the talk of the table.

# STONEWASH

For those who like to bring something special, our stone-washed cutlery brings character and charm to your table setting. Tumbler stones create the 'aged' look that has taken its place at the modern day table. At first glance every spoon, fork and knife looks the same, but when you look closer, you will see not one item is exactly alike.

# VELVET

The newest addition to the Amefa portfolio is the velvet finish. Achieved via micro sandblasting this unique finish mimics the soft feeling of a real velvet fabric. The visually captivating effect not only gives a luxurious look and feel, it's also fingerprint proof and dishwasher safe.

# AMEFA PREMIERE COLLECTION

When it comes to pulling out all the stops, with our Premiere cutlery we not only strive to meet, but exceed our customers' expectations. Effortlessly chic designs crafted in exceptional quality 18-10 stainless steel. Each piece is finished to our exacting quality standards and will give you years of exemplary service.

## Pixel

The PIXEL series brings color into everyday life. Both light and robust. With these specifications we mainly focus on institutional catering such as; cafeterias, hospitals and nursery schools. Many people gather here every day. Different groups, departments and rooms sometimes make organizing tableware and cutlery difficult.

Our answer to this is the PIXEL cutlery model. The Pixel range includes table and dessert cutlery. The smaller cutlery size is ideal for daycare centers and schools.

## Unique selling points

## Overview colors Pixel

- Blue Lagoon
- Cherry
- Mango
- Lemon

	Cake fork / gebakvork	390	156	5502852

# Felicity

**Felicity** brings the feeling of craftsmanship to the table through the coarse, imperfect decoration on the handle. The combination with a high-gloss finish gives a stylish and modern twist to any table setting. The hammered finish on the handle gives a nice reflection on the cutlery, which shows the shine perfectly.

# Phoenix

Cutlery specialist AMEFA presents **Phoenix**: this new cutlery model is made of a minimum of 80% **recycled stainless steel**. The recycled material comes from post industrial waste and the remaining < 20% virgin stainless steel is needed to adhere to the EN norms as well as guarantee the food safety and an optimal quality. For the production of recycled stainless steel less energy is needed which is why by choosing recycled cutlery you contribute to reducing the ecological footprint, decreasing the amount of waste and thus to a cleaner planet.

## SABATIER TROMPETTE®

Since 1874, Sabatier Trompette has built a reputation for outstanding cutting performance. The brand guarantees high levels of manufacturing standards throughout the manufacturing process combined of both traditional and modern technology know-how.

Focusing on form and function, we use highly sophisticated materials to produce extremely reliable and functional knives for both professional and amateur chefs.

KITCHEN KNIVES

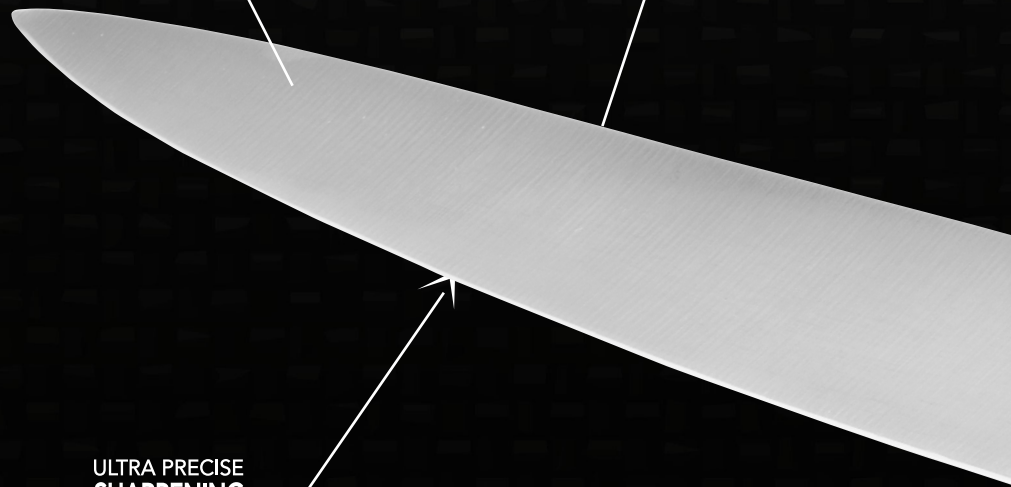

# TECHNICAL SPECIFICATIONS

All the SABATIER TROMPETTE blades are made of a high-quality steel perfectly adapted to a professional and intensive use. The molybdenum vanadium (MOV) increases the hardness and the flexibility of the blade to keep optimum cutting performances through the time. MOV is also easier to sharp.

The rounded back of blades guarantees a better comfort of use.

BACK OF BLADE  
ROUNDED

ULTRA PRECISE  
SHARPENING

The cutting edge of the SABATIER TROMPETTE blades fits all the professional requirements.

At the very end of the production process, the SABATIER TROMPETTE knives benefit from a manual leather polishing of the blade edges. This careful operation enhances the cutting performances and guarantees an excellent finishing.
