Output. No. b/n dated 24 November 2025

Dear partners

Under contract No. P42247 with ED& F Man Sugar Ltd, between 12 November and 21 November 2025, 22 vehicles and 5 vehicles were shipped from the Khorostkiv and Pavliv production facilities to the consignee: Clio Commerce EOOD, 7200 Razgrad, 5 Ropotamo Street, VAT number: BG203570114, Bulgaria.

We thank you for promptly notifying us of the technical discrepancy found in the labelling of the sugar batch (22 trucks). We have carefully checked the information and are ready to provide a comprehensive explanation.

Indeed, the batch number indicated on the bag labels (L7325 and L7125) does not match the batch number indicated in the health certificate (quality certificate) and accompanying documents (474,475...480,575...600,602...).

We confirm that the batch number indicated in the health certificate (quality certificate) and accompanying documents is the only official and correct one for this shipment of sugar. These numbers correspond to the results of laboratory tests and the manufacturer's official quality certificate, which guarantees that the product complies with the established standards.

We assure you that the quality, physical and chemical characteristics and safety of the sugar you have received fully comply with the data provided in the manufacturer's declaration. The discrepancy is purely technical/accounting in nature and in no way affects the quality or usability of the product.

This situation arose due to the peculiarities of internal production and accounting processes at our factory.

The number printed directly on the bag labels is an internal packaging/packing code (belonging to the manufacturing plant). It is used for operational tracking of products within a single plant. This is an internal logistics code (L7325 and L7125) belonging to the Khorostkiv and Pavliv production facilities.

The official batch number indicated in the manufacturer's declaration is assigned after all laboratory analyses have been completed and corresponds to the quality certificate number (health certificate and accompanying documents). This number is final and legally significant for customs clearance, shipment and quality confirmation, as it is directly linked to the test report.
