

Vacuum cleaner controller AS/E

Switches your dust extractor or vacuum cleaner on and off.

The controller supplies the power tool (either portable or stationary) and vacuum cleaner with power. It switches on the vacuum cleaner while the power tool is operational. Once the power tool is switched off, a 3 second run-down period ensures the workplace is properly vacuumed. Additional

switch positions switch the vacuum cleaner on or off permanently. Usable with power tools of 25 - 500W and vacuum cleaners of up to 1,500W.
