

Precision vise FMZ

With integral clamp.

Easily clamps to workbenches and tables of up to 60mm. Alternatively, use 2 standard screws to secure to the work surface. Zinc die-casting with ball and socket: rotates in all directions (even downwards). 75mm jaws with protective covers (for delicate workpieces). Jaws also with vertical and horizontal V-slots for clamping round workpieces. Maximum clamping width 70mm and weight 1.6kg.

No 28 608

Precision vise FMS 75

As detailed above, but without clamp. A strong suction cup facilitates instantaneous fixing to any smooth, flat surface.
