

With a planing thickness of 40 x 80 mm the smallest and finest in the world!

Thicknesser DH 40

Perfect for vibration-free planing of soft and hard woods giving you smooth and fine finished surfaces for smaller work. Aluminium die-cast planing table with a milled surface can be adjusted via a hand wheel to within 1/10 mm, dial is resettable to zero. Automatic and consistent feed with kick-back protection. The knurled and suspended feeder roll accepts uneven work pieces too. A rubberised move-out roll protects the planed surface.

The precision planer shaft has replaceable planer blades with carbide edge. Dust-protected on/off switch with restart protection after power cut.

Technical Data:

Motor is 220 - 240 V. 200 W, 50 - 60 Hz. Planing thickness up to 40 mm, width up to 80 mm. Chip decrease up to 0.8 mm. Velocity of feed 4.8 m/min. Table length 232 mm. Size 280 x 230 x 235 mm. Weight 8 kg.

Note:

For better planing results, take a little off your timber at a time.

Replacement Blades

Made of carbon steel, 82 mm long.
