

The ideal Bench Drill Press for laboratory, workshop or delicate drilling work.

Bench Drill Press TBH

The height adjustment is easily altered by means of the headstock lock lever.

The table features a ribbed base, milled work area with T-slots. The column is bright nickel plated. Powerful, long life 220 - 240 V permanent magnet motor. The quill is driven via a belt and three step pulleys. This yields a torque multiplication of as much as 6x at the lowest speed. Geared quill feed for exact operations runs in ball bearings. Spindle with 1/2" thread accepts the standard chuck, as well as the optional collets.

Technical Data:

220 - 240 V motor with spindle speeds 1,080, 2,400 and 4,500 rpm. Quill travel 63 mm. Maximum drill bit size 10 mm, which is also the capability in steel. The optional collets offer a capacity to 6 mm. Throat 140 mm. Useable table size 200 x 200 mm. Column 45 x 500 mm.

NO 28 124

- ① Practical depth gauge with adjustable depth stop.
- ② Ideal for jig drilling with the KT 150.

Collet Set

Triple slit and hardened. One each of 2.35 - 3.0 - 3.2 - 4.0 - 5.0 and 6.0 mm. Also includes the collet closure nut (M17) and packed in wooden box with sliding lid.

NO 28 200
