Quattroplasty™

Joline[®] Medical
Technology

Experts in Care.

Founded in 1999.

Privately owned family
business.

All Joline employees are
fully focused on servicing
and supporting healthcare
providers.

Medical company with over
160 employees.
60 % have been working for
Joline 10 years plus*.

Several workshops and trainings per year for all
medical professionals on how to use Joline medical
devices.

More than 285,000 minimally invasive therapies
are performed with Joline medical devices per year,
which equals in more than 32 per hour.

Every 2 minutes, a patient receives treatment with
medical technologies from Joline.*

Specialized in four areas of expertise

Dialysis

Spine

Stents & OEM

Cardiology

One of the global goals of the United Nations is
to ensure healthy lives and well-being for every
patient at all ages. Joline contributes to this global
goal by developing and manufacturing medical
devices for diagnostics (cardiology), minimally
invasive treatment (spine) and life-sustaining
treatments (dialysis).

All Joline medical devices are designed and
manufactured in Germany.

Production and development of stents and
implants as a contract manufacturer (OEM).

Minimally invasive treatment
methods can help to reduce
the burden on patients
and shorten the length of
hospitalization.

Certified according to
EN ISO 13485:2021.

More than 20 patents
assigned to Joline.

Medical devices sold
worldwide with direct sales
in Germany and Austria, all
other geographies served
with experienced distribution
partners in Europe, United
States of America, Africa,
Latin America and Asia.

Joline's Dialysis,
Spine and Cardiology
medical devices are
CE-certified.

Vertebral Body Reconstruction

Balloon Kyphoplasty

Bone Access Instruments

Classic Access

Vertebra Access Device, Trocar Tip S9101

The Vertebra Access Device, Trocar Tip is also known in professional circles as the Jamshidi-Needle.

Guide Pin, blunt S9102

The Guide Pin, blunt acts as a guide for the Vertebra Introducer Device (S9201).

Vertebra Introducer Device S9201

The Vertebra Introducer Device is inserted into the vertebral body over the Guide Pin, blunt (S9102).

Vertebra Introducer Cannula S9202

Additional Vertebra Introducer Cannulas (S9202) can be used for bipedicular treatment of the vertebral body and for the treatment of multiple vertebral bodies. These are inserted into the vertebral body with the aid of the released introducer stylet (S9201/S9213/S9312).

Bone Access Instruments

Direct Access (One-Step)

**RapidIntro Vertebra Introducer Device,
Bevel Tip**
S9213

This Bone Access Instrument is equipped with a stylet tip that is bevelled on one side.

**SpeedTrack Vertebra Introducer Device,
Short Tip**
S9312

This Bone Access Instrument is equipped with a short stylet tip.

Vertebral Body Reconstruction

Balloon Kyphoplasty

Bone Access Instruments

Further Access Instruments

Introducer Cannula Plug S9203

The Introducer Cannula Plug is inserted into the Vertebra Introducer Cannula (S9202) to prevent inadvertent blood leakage.

Vertebra Biopsy Device S9301

The Vertebra Biopsy Device can be used to take a biopsy sample.

Bone Drill S9302

The Bone Drill can be used to create a working channel in the vertebral body for the balloon catheter.

Curette S9410

The Curette is designed to scrape off bone tissue in the vertebral body.

Balloon Catheters

Quattroplasty™ Double Balloon

Stop'n GO Double Balloon Catheter 2 x 8 mm S9420

Balloons: Ø 16 mm, Balloon length = 2 x 8 mm
max. pressure 27 atm (400 psi) / max. vol. 2 x 3 ml

The Stop'n GO Double Balloon Catheter 2 x 8 mm (Quattroplasty™) is an advancement of the Single Balloon Catheter. The Double Balloon technology provides the surgeon with four instead of two balloons per vertebra to restore vertebral height of the fractured vertebra.

Depending on the geometry of the pedicle, the midline can also be accessed via a unipedicular approach using the double balloons, and address the opposite half of the vertebral body.

Bipedicular

Unipedicular

Vertebral Body Reconstruction

Balloon Kyphoplasty

Balloon Catheters

Kyphoplasty Single Balloon

Balloon Catheter 16/16

S9402

Balloon: Ø 16 mm, Balloon length = 16 mm
max. pressure 27 atm (400 psi) / max. vol. 4 ml

Balloon Catheter 22/16

S9403

Balloon: Ø 16 mm, Balloon length = 22 mm
max. pressure 27 atm (400 psi) / max. vol. 6 ml

■ Our Single Balloon Catheters are available in lengths of 16 mm and 22 mm.

Quattroplasty™ Double Balloon Advantages over Single Balloon

- The pressure and volume of each single balloon is adjusted separately.
- With the Stop'n GO Double Balloon Catheter 2 x 8 mm, the surgeon uses up to FOUR balloons in one vertebral body.
- The necessary force is directed to the desired point to reconstruct the vertebral body step by step.

Vertebral Body Reconstruction

Balloon Kyphoplasty

Balloon Catheters

Accessories for the Catheter Preparation

Inflation Device

S9502

max. pressure 30 atm (440 psi)

The Inflation Device is used to inflate and deflate the balloons of the Kyphoplasty Catheters in the vertebral body. This allows a targeted cavity to be created for the bone cement.

Vacuum Syringe

S9503

The Vacuum Syringe is used to remove air from the Balloon Catheters 16/16, 22/16, the Stop'n GO Double Balloon Catheter 2 x 8 mm and the Double Balloon Adapter before use.

Double Balloon Adapter

S9520

The Double Balloon Adapter is used in combination with the Inflation Device to separately inflate and deflate the balloons of the Stop'n GO Double Balloon Catheter 2 x 8 mm.

Cement Application

Bone Cement

BonOs® Inject 1x24 S9702

BonOs® Inject is a PMMA Bone Cement that is specifically adapted for spine surgery. The cement is suitable for the fixation and filling of symptomatic vertebral compression fractures, vertebral tumors and vertebral hemangioma.

OSTEOPAL® V 1x20 S9704

This PMMA cement is characterised by its shorter preparation time vs. other bone cements on the market.

OSTEOPAL® plus 1x20 S9705

OSTEOPAL® plus with time bonus

- Longer working time
- Based on OSTEOPAL® V PMMA cement
- Particularly suitable for multi-level vertebral augmentation
- Optimised viscosity for easy application
- Contains radiopaque zirconium dioxide to enhance controlled cement application

Vertebral Body Reconstruction

Balloon Kyphoplasty

Cement Application

Cement Mixing System

QuattroMix®
S9620

The QuattroMix® is available separately.
The QuattroMix® is intended for mixing and transferring bone cement during balloon kyphoplasty.

Cement Application

Application Instruments

Vertebra Filler Device (frontal opening) S9601

This Vertebra Filler Device has a frontal opening.

With all Joline Vertebra Filler Devices up to 1,5 ml of bone cement can be applied into the vertebral body.

Vertebra Filler Device (side opening) S9602

This Vertebra Filler Device has a side opening.

Vertebra Filler Device flexPlunger (frontal opening) S9604

This Vertebra Filler Device flexPlunger has a frontal opening.

The shaft of this Vertebra Filler flexPlunger (frontal opening) is flexible and allows it to be used when the distance between the patient and the C-arm is small.

Smart Kits Double Balloon Catheter Stop'n GO 2 x 8 mm / OnePedicule Kits

Smart Kit Type Jamshidi OnePedicule Stop'n GO 2 x 8 mm S5103

Balloons: Ø 16 mm
Balloon length: 2 x 8 mm

Kit components:

- 1 x Vertebra Access Device, Trocar Tip
- 1 x Guide Pin, blunt
- 1 x Introducer Cannula Plug
- 1 x Vertebra Introducer Device
- 1 x Vertebra Biopsy Device
- 1 x Bone Drill
- 1 x Stop'n GO Double Balloon Catheter 2 x 8 mm
- 1 x Double Balloon Adapter
- 1 x Vacuum Syringe
- 1 x Inflation Device
- 2 x Vertebra Filler Device (frontal opening)
- 1 x Vertebra Filler Device flexPlunger (frontal opening)

Smart Kit Modular OnePedicule Stop'n GO 2 x 8 mm S5104

Balloons: Ø 16 mm
Balloon length: 2 x 8 mm

Kit components:

- 1 x Stop'n GO Double Balloon Catheter 2 x 8 mm
- 1 x Double Balloon Adapter
- 1 x Vacuum Syringe
- 1 x Inflation Device
- 2 x Vertebra Filler Device (frontal opening)

Kyphoplasty Kits

Smart Kits Single Balloon Catheter 16/16, 22/16

Smart Kit Type Jamshidi 16/16, 22/16 S1005 / S1006

S1005:

Balloon: Ø 16 mm

Balloon length: 16 mm

S1006:

Balloon: Ø 16 mm

Balloon length: 22 mm

Kit components:

- 2 x Vertebra Access Device, Trocar Tip
- 2 x Guide Pin, blunt
- 2 x Introducer Cannula Plug
- 1 x Vertebra Introducer Device
- 1 x Vertebra Introducer Cannula
- 1 x Vertebra Biopsy Device
- 1 x Bone Drill
- 2 x Balloon Catheter
- 1 x Vacuum Syringe
- 2 x Inflation Device
- 4 x Vertebra Filler Device (frontal opening)
- 2 x Vertebra Filler Device flexPlunger (frontal opening)

Smart Kit SpeedTrack Short 16/16, 22/16 S1018 / S1019

S1018:

Balloon: Ø 16 mm

Balloon length: 16 mm

S1019:

Balloon: Ø 16 mm

Balloon length: 22 mm

Kit components:

- 1 x SpeedTrack Vertebra Introducer Device, Short Tip
- 2 x Introducer Cannula Plug
- 1 x Vertebra Introducer Cannula
- 1 x Vertebra Biopsy Device
- 1 x Bone Drill
- 2 x Balloon Catheter
- 1 x Vacuum Syringe
- 2 x Inflation Device
- 4 x Vertebra Filler Device (frontal opening)
- 2 x Vertebra Filler Device flexPlunger (frontal opening)

Smart Kits Single Balloon Catheter 16/16, 22/16

Smart Kit RapidIntro Bevel Tip 16/16, 22/16 S1044 / S1045

S1044:

Balloon: Ø 16 mm

Balloon length: 16 mm

S1045:

Balloon: Ø 16 mm

Balloon length: 22 mm

Kit components:

- 1 x RapidIntro Vertebra Introducer Device, Bevel Tip
- 2 x Introducer Cannula Plug
- 1 x Vertebra Introducer Cannula
- 1 x Vertebra Biopsy Device
- 1 x Bone Drill
- 2 x Balloon Catheter
- 1 x Vacuum Syringe
