CT HEAD

Detailed AI-powered CT Brain Analysis

Supports radiologists in interpreting brain CT scans
in both acute and routine cases.

Supports radiologists
in interpreting brain CT scans
in both acute and routine cases.

Delivers **results within 3 minutes**,
available immediately after
the examination.

**Reduces the risk of overlooked
findings** — identifies up to one additional
hemorrhage per 100 CT scans.

Automatically **detects and highlights
30 conditions**, including hemorrhages,
infarctions, tumors, and edema.

For stroke patients, **it shortens
the average stay in the emergency
department by 69 minutes.**

**Seamlessly integrates
with PACS/DICOM**, available as
a cloud or on-premise solution.

Proven Impact on the Speed and Accuracy of Care

-69 min

saved in stroke cases

-66 min

saved in intracerebral
hemorrhage

-33 min

saved in head trauma

**Faster diagnosis.
More confidence. Better care.**
