

# EUROPART Disc brake pad

- Production according to the highest automotive standard (IATF16949), certified by Dekra and continuously monitored
- Product certification to UN ECE R90
- Developmental testing scope exceeds R90:
  - Comfort: Noise testing
  - Service life: Disc tolerance
- Automated production processes with cutting-edge equipment
- Multi-composite friction lining: Includes bonding agents (milled resins), fibre components (including mineral wool, glass fibre), lubricants (graphite powder, metal sulphide powder), metallic (e.g. copper, steel) and mineral (e.g. aluminium oxide) fillers
- Mix of friction linings optimised to suit the user profile
- No undesirable braking noises
- Accessory parts provided
