

EUROPART Battery chargers

- production certified to the highest quality standard DIN ISO 9001, and continuously monitored by independent institutions
- CE-certified and labelled
- high quality charger and trickle charger for 12V and 24V batteries
- ideal for a battery capacity of 50-450 Ah (12 V), 25-230 Ah (24 V)
- charging current up to 25 amps
- electronic steering and control of the charging current with an integrated 9-phase micro-processor
- ideal for all conventional vehicle batteries (WET/MF/GEL/EFB/AGM/Ca-Ca)
- a boost function ensures desulphation and thereby a longer battery service life
- supply voltage mode to maintain vehicle memory when changing battery
- special mode for loading cold and AGM batteries
- polarity reversal protection
- integrated fan protects against overheating
- water and dust protected in accordance with international Norm IP44
- accessories: connecting pliers, eyelets, cable for motorcycle batteries
