

BEAUTIFUL RETRACTION

RetraXil®

Good sulcus exposure – minimally invasive application

RetraXil® provides a cleanly opened gingival sulcus and ensures beautifully exposed, blood-free preparation margins. Its syringe sits comfortably in the hand and supports precise dosing of the material.

Your benefits:

- » Atraumatic application
- » Adequate tissue management
- » Multidose stable syringe
- » No curls, no tear-off, non-stick

Giving a hand to oral health.

KULZER
MITSUI CHEMICALS GROUP

RetraXil® – Beautiful Retraction

Efficient, gingival retraction with highest standards in handling and safety

Safety during application

- No risk of systemic overdose
- Clear colour contrast to the gingiva and teeth offers high visibility and good control when rinsing
- Twisting aid offers secure fit of the cannula on the syringe and enables the cannula to be twisted on and off safely

Good handling features

- Thin cannula offers precise and atraumatic application into the sulcus and interproximal areas
- Compatible with analogue and digital impression techniques

Economical and time-saving

- Fewer work steps compared to retraction cord technique

The consistency of a paste – the stability of a cord

RetraXil® offers atraumatic and easy access to the sulcus thanks to the thinnest cannula on the market
