# TECHNICAL SPECIFICATION

## NATURE@HOME KIT

### NATURE @ HOME UNIQUE HIGHTACK 26-10

<b>Material</b>	High Tack 26-10 is a one-component construction adhesive. It has a very high initial adhesion, based on Silyl Modified Polymer (SMP), which cures by air humidity to a durable elastic rubber. Neutral, odourless, non-blowing and non-shrinking, UV and weather resistant and adheres perfectly without primer to almost all surfaces, even damp ones. After complete curing, High Tack 26-10 remains elastic and can be sanded and painted. Moreover, it absorbs acoustic vibrations and mechanical oscillations.
<b>Application</b>	As adhesive and sealant suitable for industry. For bonding, sealing and mounting indoors and outdoors. Bonding of facade cladding. Structural bonding in vibrating constructions. Gives adhesion on damp surfaces. Not suitable for PE, PP, PTFE, Neoprene and bituminous substrates
<b>User manual</b>	Substrates must be clean, dry, dust- and grease-free for maximum result and strength. Remove excess adhesive immediately after use with Unique Cleaner.
<b>Shel life</b>	In closed container at least 12 months. Store in a cool and dry place, between 5 and 25 °C.
<b>Colour</b>	Black / Transparent
<b>Content</b>	290 ml
<b>Item number</b>	900910/ 900911
